Response to Amendment

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Allowable Subject Matter

2. Claims 1-9 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Regarding the independent claims 1 and 5, the prior art does not suggest calculating final filters as claimed. More specifically, neither Grill nor Laurent teach a system that calculates the coefficients for digital filters, wherein the final number of filters deployed in the working system is less than the initial number of filters. Neither reference nor the prior art teaches a system that merges the adjacent filters' coefficients to reduce the number of filters, wherein the final filter is recalculated for a respective stronger signal in a mixed audio signal environment.

Claims 2-4 and 6-9 are allowed because they depend on the allowed independent claims 1 and 5.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
